## CAREER OBJECTIVE

A passionate software developer seeking employment as a full-stack web developer with an organization that encourages creativity and innovation in their projects.

---

## EDUCATION

**SASI INSTITUTE OF TECHNOLOGY AND ENGINEERING COLLEGE, Tadepalligudem**

**June 2022**

Bachelor of Technology

CGPA: 6.8

**Narayana junior college, Vijayawada**

**March 2018**

Class 12<sup>th</sup>

Percentage: 87.5%

**Viswa Teja e.m high school, Kamavarapukota**

**April 2016**

Class 10<sup>th</sup>

CGPA: 8.0

---

## TECHINICAL SKILLS

- **Languages:** JAVA (Core Java), JAVASCRIPT
- **Web Technologies:** HTML, CSS, Bootstrap, ReactJS, RESTful Web Services,
- **Frameworks:** Spring Framework (Spring Boot, Spring MVC, Spring Security), Collections, Hibernate/JPA
- **Database:** MYSQL, Firebase
- **Tools & Servers:** Apache Tomcat, Spring tool suite, GitHub, Postman, Visual Studio Code, Eclipse IDE
- **Platform:** Windows

---

## PROJECTS

- **Chatting Web Application** [Project Link](#)  
Developed a responsive chat application using React (Vite), HTML, and CSS. Integrated Firebase for real-time messaging, user authentication, and profile management. Implemented Google account sign-in via Firebase Auth, allowing users to securely register and log in. Users can also upload profile pictures, which are stored in Firebase and displayed in the chat interface. The application's design ensures a seamless experience across devices. Firebase's real-time database syncs messages instantly, providing smooth, real-time communication among users.
- **Weather Dashboard** [Project Link](#)  
Developed a weather dashboard using React (Vite), HTML, Tailwind CSS, and JavaScript. Integrated the OpenWeatherMap API to fetch real-time weather data, displaying current conditions, forecasts, and location-specific information. The dashboard features a clean, responsive design, ensuring an optimal user experience across devices. Tailwind CSS was used for efficient styling, while React component-based architecture allowed for easy management of dynamic data. Users can search for weather updates by city, with the interface automatically adjusting to provide detailed weather information for the selected location.
- **My Dairy Web Application** [Project Link](#)  
Created a personal diary web application using Spring Boot for the backend and Thymeleaf for the frontend. Implemented user authentication features, enabling users to securely register, log in, and manage their diary entries. The application allows users to create, view, edit, and delete diary entries. Deployed the app on AWS, ensuring scalable and reliable access for users to maintain their personal notes from anywhere. The deployment leverages AWS services to provide robust performance and high availability.

---

## CERTIFICATES

- Pursued JAVA FULL STACK course along with Internship for 6 months at Social Prachar Institute, Hyderabad.
- TCS ION Career Edge – Young Professional in TCS Ion.
